DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a semiconductor device, classified in class 257, subclass 679.
- II. Claims 5 and 6, drawn to a method of manufacturing a semiconductor device, classified in class 438, subclass 15+.
- III. Claims 3 and 4, drawn to a signal process system, classified in class 700, subclass 1+.
- IV. Claims 7 and 8, drawn to a reader/writer, classified in class 365, subclass 189.01.
- V. Claim 9, drawn to a method of operating a reader/writer, classified in class 365, subclass 189.04.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, instead of the process used to receive the second signals having the second level outputted from the first apparatus through the plurality of the third bonding pads, it can be used to receive the first signals having the first level outputted from the second apparatus.

Art Unit: 2826
